

Gifted and Talented

POUDRE SCHOOL DISTRICT

Polaris Expeditionary Learning School

Polaris is the only school within PSD to offer the Expeditionary Learning model. Our learning environment naturally gives teachers the ability to differentiate for students who are gifted learners, or who have other special learning challenges and needs. Colorado standards are utilized to design in depth studies of compelling topics over an extended period of time, also known as Expeditions. Students can dive into their passions during frequent fieldwork experiences, intensives, and Adventure trips. At Polaris, the Expeditionary Learning approach creates life-long learners who can think critically, solve problems creatively, and adapt successfully to an ever changing world.

Programming Opportunities for Gifted Learners

At grades 6, 7 and 8, we offer a compacted math pathway for students who qualify. These students would receive 6th and half of 7th grade math standards in sixth grade and the other half of 7th and all of 8th grade math standards in 7th grade. 8th graders are then able to take Algebra 1 or Geometry. Students qualify based on a body of evidence and are placed appropriately. In high school, the full block schedule allows students to work through two years of math, English, Science, or other area they are advanced or identified as gifted in. Students can begin taking college courses at the PSD Future's Lab and through FRCC high school and campus select as early as 9th grade.

Gifted and Talented site coordinator:

Cynthia Erickson M.Ed | School Counselor/ CTE Specialist/ GT Coordinator
