

## Early Childhood Assessment Team (ECAT)

The Early Childhood Assessment Team (ECAT) is a multidisciplinary group of educators committed to identifying and supporting the developmental needs of early childhood students.

Through comprehensive screeners and evaluations, the team assesses key areas such as speech and language, motor skills, social-emotional functioning, early academic skills, and cognitive development. ECAT collaborates closely with families, caregivers, and educators to ensure that each child receives the support they need to thrive.

The team aims to promote positive outcomes in early learning and development by fostering strong partnerships and utilizing evidence-based practices.
