

IMA - TEACHING METHODS

It is the desire of the Board that the best available strategies and methods for bringing about learning be utilized in the district's schools. The instructional staff shall be expected to keep abreast of new instructional ideas and practices developed in schools throughout the nation and to apply those which have potential for improving the learning program in the district's schools.

An educational climate shall be established which shall be conducive to rational thought, free inquiry, and respect for the dignity of the individual. Students shall be taught how to think rather than what to think and shall be provided the opportunity to identify, express, and defend their opinions without penalty or fear of reprisal or ridicule.

Strategies and methods shall focus on the personalization of learning, including appraisal of individual learning styles, abilities, and disabilities; assessment of individual learning needs; and development, implementation, and evaluation of individual learning programs.

The Board recognizes that on occasion a teaching method or strategy may be utilized which some parents may find objectionable. Parents are encouraged to discuss their concerns with the classroom teacher at the beginning of the school year or at any other appropriate time.

Learning alternatives may be provided when a student's parent/guardian determines that the student should not be exposed to the assigned methods, activities, or presentations.

Nothing in this policy shall limit the rights of a parent/guardian to file a complaint to challenge the use of a teaching method, activity, or presentation.

Adopted: June 10, 1996
